## W13-P1: Use fetch API to get person.json data

20cea8f anan826 Thu May 11 19:12:23 2023 +0800 W13-P1: Use fetch API to get person.json data

## W13-P2: Show /api/data.json, img using remote\_url

The screenshot displays a development environment with two main windows. The left window is a code editor showing a JavaScript file named `datajson.js`. The code defines a `displayMenu` function that fetches data from `/api/data.json` and renders a menu. Red boxes highlight the `const url = './api/data.json'` line and the `img src="${item.remote_img}" alt="${item.title}"` line in the template. The right window is a browser preview showing the rendered menu. A red box highlights the `img src="https://styliryslfzxeqlxp.supabase.co/storage/v1/object/public/demo-58/menu_58/item-1.jpeg" alt="buttermilk pancakes" class="photo"` line in the HTML output. The browser preview also shows the rendered menu items, including "Buttermilk Pancakes" and "Diner Double".

## W13-P3: 建立 supabase 資料庫

The screenshot shows the Supabase Table Editor interface. The table `menu_58` is displayed with the following columns: `id`, `title`, `category`, `price`, `img`, `remote_img`, and `descrip`. The table contains 9 records. A red box highlights the `remote_img` column, which contains URLs for the menu items.

id	title	category	price	img	remote_img	descrip
1	buttermilk pancakes	breakfast	15.59	/menu/images/item-1.jpeg	https://styliryslfzxeqlxp.supabase.co/st	Lorem ipsum dolor sit amet consectetur e
2	diner double	dessert	13.99	/menu/images/item-2.jpeg	https://styliryslfzxeqlxp.supabase.co/st	Lorem ipsum dolor sit amet consectetur e
3	godzilla milkshake	shakes	6.99	/menu/images/item-3.jpeg	https://styliryslfzxeqlxp.supabase.co/st	Lorem ipsum dolor sit amet consectetur e
